Introduction

Permissiveness to citizens to dispose of the innocent lives of their stillborn children causes quite contradictory opinions. Abortion is a murder or an attempt to reduce the percentage of orphans and homeless beggars. Explaining dry medical terminology, abortion is a surgical intervention aimed at abortion by artificial means. More or less safe for the above procedure is a period of up to 20 weeks, with the fetal weight not exceeding 400 g. During the operation, both local anesthesia and general anesthesia can be performed. However, no doctor will give guarantees that the procedure will pass for your body without consequences. Abortion, as a method of getting rid of unwanted pregnancy, was known in ancient times. Under the laws of Ancient Greece and Rome, the life of the fetus was not protected, and the termination of pregnancy was not punished. However, this practice could not be spread widely since abortion almost always represented a serious danger to the mother and child, very often fatal to the mother. Fruit expulsion was considered an immoral act and punished when it was conducted for selfish purposes or for other baser motives.

Thesis Statement: In order to prevent abortion, it is desirable to provide additional public outreach on government resources and educate teenagers by showing films about abortion so that they think about it before deciding to have an abortion.

Persuasive Analysis

I understand that there are different situations; someone threw a husband, someone lives on a penny, someone became pregnant from an accidental or married lover, someone has strict parents, or someone has not matured yet. But I do not understand just why a child should pay for someone's sex with his life. "Why to produce poverty?" – They ask me, opponents. In my opinion, neither alleged poverty nor even orphanhood can justify the killing of a child.

Participating in various actions of the NGO "Our Future," the volunteer of which I am, most often I hear: "What murder? There's a lot of cells. "By the time a woman learns of the pregnancy, the baby is already forming a heart. As it beats, you can even see it on an ultrasound in five weeks of pregnancy. In a crumb 2 mm in size, the nervous system and internal organs are formed. He feels pain when he,

dismembering, is removed from the uterus of a woman. At 12 weeks – before this date, abortions have been officially authorized in America for no reason – this is a real man, only a small one, six centimeters in size. All stages of the development of the baby inside the mother can be seen firsthand; there are enough similar films on the Internet. There are also videos showing how abortion occurs. The film is called “Silent Scream”. I advise viewing to all who believe that abortion – it’s nothing terrible and generally the right woman (World Health Organization, 2022). I hate violence and coercion; I always protect the rights of any person. But our rights end when it comes to the life of another person. This is the basis of any legislation. It is believed that a 5-12-week-old child is not a human being yet. He’s supposedly not yet.

No, dear citizens, the child you may be planning now. Here, it can still be canceled. And the one that is conceived and developed in the body of a woman cannot be canceled. He already exists; it’s just that – so is a person – in the body of his future mother. The principal difference is where the baby is – still in the mother’s body or already outside it, no.

In principle, adults should be aware that sex can lead to the conception of a child. For that, he, in fact, is intended. Means of contraception are now widely available, and the choice is great. Yes, it happens that the means of protection fail. And you need to be ready for this. There is a variant to make sterilization, the truth, here too there are conditions. A woman cannot be less than 35 years old, or she should already have at least two children even if the woman is child-free if she does not want to be a mother at all. So, our state is fighting for demography, allowing about 10 thousand abortions a day.

For me, this is equivalent to the fact that it is legal to allow the killing of old and burdening relatives. Let’s say an old mother came down. She is 85 years old, she will not rise again, she is not in her right mind, and she goes under herself and can be in this state for ten years. You will either have to quit your job or hire a nurse for a lot of money. Sometimes, you will not sleep at night, sometimes, you will deny yourself anything, and sometimes, you will cry under a pillow. And yet, the law forbids its strangulation by this pillow itself because it’s killing a defenseless person. A conceived child, after the birth of which you, perhaps, will not sleep at night, cannot work, do not buy a mink coat, can be destroyed legally. The only difference is that the kid will give you a sea of positivity, will smell milk and honey, and will tell you that you are the best in the world. This child will grow up, and maybe, exactly, he, whom you did not kill, will take care of you when you become this very old mother. But most of all, I am amazed by women who use abortion as a means of protection, if I may say so (Giubilini, 2024). They are not too concerned about contraception but clearly plan their lives. For example, they became pregnant, but the furniture in the new apartment has not been bought yet. Or they need pregnancy in six months, and not right now. The solution is simple, easy, and not moody abortion.

Conclusion

In order to prevent such a situation and to reduce the abortion rate in the country, it is better to provide additional public outreach on the government resources to show films about abortions for teenagers so that they think about it before deciding to do so. Maybe this will at least slightly reduce the number of children killed in the mother's womb. It is much easier to protect than to disassemble consequences. Take care of your health and the health of your loved ones. It is necessary, in my opinion, to educate children from kindergarten, naturally, within a reasonable age for them. Tell more grown-up children about love, about high, romantic love, and about sexual intercourse between a man and a woman, about what sexual intercourse leads to. Try to say to teenagers that there is no need to hurry up with entering into sexual life. However, parents need to be educated, too, because modern parents are often not so romantic in family relationships and are literate in educating their own children. Alas. A ban on abortion can lead to the fact that we will lose not only the unborn children but also women who can subsequently give birth to the planned coveted child and raise from him a worthy person. However, no one will say that abortion is good. It is clear to any reasonable person that this is bad. And abortion itself, and its prohibition is a double-edged sword, just the two evils have to choose the smallest. And to give a choice, in my opinion, it follows, after all, to a woman.
