

Features Applications and Programming Concepts of IBM REXX

Posted on July 28, 2022

This IBM REXX training covers concepts from the Basic level to the advanced level. Whether you are an individual or corporate client, we can customize training course content to meet your requirements. I can arrange this IBM REXX training at your pace.

IBM developed an Interpreted Programming Language called REXX, which stands for REstructured eXtended eXecutor. Thus, this module was named "IBM REXX." This language is an organized high-level programming language, mainly designed for ease of learning and reading for both inexperienced users and experienced programmers to combine REXX instructions and host commands and services into programs. This language is used as a scripting and macro language, which is mainly used for processing data and text and generating reports. In some Operating Systems such as AmigaOS, VM, MVS, etc., REXX is considered to be the Primary Scripting Language, and in some other software such as SPFPC, KEDIT, etc., REXX plays the role of Internal Macro Language.

Features Of REXX:

1. Easy-to-learn and understand the instructions and simple syntax & format.
2. It has the ability to route commands to multiple environments.
3. Their instruction set is too small. It contains only two dozen instructions.
4. It has got the quality of Automatic Storage Management.
5. Dynamic data typing is only required while writing this programming language; no declarations are required.

Complete Customization of IBM REXX training's course content is possible for Individual students and for corporations. IBM REXX online training is available for individuals and corporations; we may arrange the classroom as well. For more information on IBM REXX training, do contact us.

Our IBM REXX certified expert consultant will teach on a real-time scenario-based case study and can provide study material and PPT. We will help you to clear the IBM REXX training certification by providing you with proper guidance. For more details kindly contact us.

When it comes to IBM REXX Corporate Training, we can say proudly that we have received excellent feedback and appreciation from our corporate clients across the globe. You can reach us for IBM REXX corporate training, and we can even customize the training content to meet your requirements.

A Few Of The Clients We Have Served Across Industries Are:

DHL | PWC | ATOS | TCS | KPMG | Momentive | Tech Mahindra | Kellogg's | Bestseller | ESSAR | Ashok Leyland | NTT Data | HP | SABIC | Lamprell | TSPL | Neovia | NISUM and many more.

MaxMunus has successfully conducted 1000+ corporate training in Bangalore / Bengaluru, India, Finland, Sweden, Germany, USA, UK, Netherlands, Ireland, Austria, Israel, Singapore, Australia, Canada, Denmark, Qatar, Saudi Arabia, Oman, Denmark, Bahrain, JAPAN, South Korea, UAE, Switzerland, Kuwait, Spain, United Kingdom.

Individual Training Benefit

- Customize IBM REXX Course Content as per individual project requirements.
- Our Individual IBM REXX Training program will help employees start working on the project from day one after the IBM REXX training completion.
- Industry-specific subject matter experts will provide corporate-level IBM REXX online training to individuals.
- Flexibility in choosing a schedule for individuals to take IBM REXX online training courses.
- Get Flexibility to learn at your own pace. A crash course option is also available for the IBM REXX course.
- Flexibility to select a trainer and have a live video session with a trainer before IBM REXX training actually starts.
- MaxMunus will provide IBM REXX Course Completion Certificates to the participants, which are recognized by the industry. It will add value to the corporate workforce.
- MaxMunus will help the participants understand the IBM REXX certification training exam process.
- MaxMunus will provide a step-by-step progress assessment of yours.

Corporate Training Benefit

1. Customize IBM REXX Course Content as per Company project requirements.
2. Our IBM REXX Corporate Training program will help employees start working on the project from day one after the training completion.
3. Industry-specific subject matter experts will provide IBM REXX corporate training.
4. Get flexibility in choosing the location, mode, and schedule for IBM REXX corporate training courses.
5. Flexibility to select a corporate trainer and have a live video session with a trainer before IBM REXX training actually starts.

6. MaxMunus will provide Course Completion Certificates to the participants, who are recognized by the industry. It will add value to the corporate workforce.
7. MaxMunus will help the participants understand the IBM REXX certification course exam process.

MaxMunus will provide a step-by-step progress assessment of employees.
