

Police Misuse Of Fatal Force

Posted on November 2, 2018

Introduction

In my essay, I will focus on psychosis in the discussion of the way the police misuse their power, causing a lot of the killings, and in particular, I will reflect on the USA. It is very true that any given officer who will be in a position of shooting someone will typically undergo some physiological way of evaluation. Police killing is a very cruel thing to put on the table for discussion, and it is supposed to be taken under heavy weight. Since the police force is endorsed for the purpose of serving the nation and its citizens, misuse of this power will lead to a great negative impact, and it will draw attention to concern. It is very true that in the USA, there is no anybody who chronicle is given any mandate for the usage of the police force for the purpose of killing people. There are so many people who are killed in the process of the police scene, and this mostly happens when there is a confrontation between the police and the citizens. This can act in the process of political issues or even the power division in the country. It has been noted that this has affected the psychosis of the citizens of the country. Many innocent citizens have lost their lives during this period of time based on the fact that the police have changed their role from being police to a kind of police terror attack in most parts of the USA. This is well-recorded in the daily USA news articles and on news television (CNN). In this case, police officers are regarded as good trains for instant occasions, and the decisions that they make may have a great impact on the lives of mere citizens. For instance, in just a week, a Cincinnati suburb recorded a teen who was shot dead by a police officer just by the reckless opening of a gun. Just as in the USA, community, and society, there is a lenient way of handling those who apply their access power in police cases at the expense of mere US citizens.

The Concern In Police Force Misuse

There are some scholars who are keenly dealing with and against the actions of the police in this case and mention but a few; Brigitt Keller brings the sense of the police who misuse their forces and do not take the required measures to cater for this loss of life just in the innocent citizen. The Department of police accountability and Investigation is putting some strategies in place to make sure that any police officer who is caught, in this case, is taken accountable and tough measures are taken against him. In this case, Ohio is considered to require no form of investigation for any given police officer shooting the citizens without lawful reason.

Measures Were Taken For The Prevention Of Misuse Of Power By Police

It has been established that the government is extending its hand to make sure that the personnel under which the police work or the order for killing is highly followed and made sure that the individuals who are involved in this killing are put under the court for answering the case files. The standards of the nation are the core way for the people to serve, and the following rights can be determined by making sure that there are strategic ways of administration made in the country for smooth progress. The standards give the Corner stone for the development of the country, and without them, there will be a lot of difficulties in finding which is reliable data information for the reports of the cases under which the police misuse the power that they are given the protection of the USA citizen. The International Association of Chiefs of Police published *Police Use of Force in America* in 2001, presenting findings from a national use-of-force database. It was a research report, not an act of legislation. Legal limits on police force instead arise from constitutional law, statutes, court decisions, and agency policies, including the U.S. Department of Justice policy on the use of force (U.S. Department of Justice, 2022).

Impacts Of Police Misuse Of Force

Thomas Aveni has given clear information that the police have shown a lot of prosecution when it comes to the defense mechanisms, which has led to a lot of deadly shootings and the civil ways of the trials. (National Academies of Sciences, Engineering, and Medicine, 2018) It has been known that most of the police bring a lot of the killing in the name of errors in making a judgment on who they are supposed to shoot, and in the process, they end up shooting innocent citizens. This has disturbed people's way of life, particularly in the USA. A lot of fear and suspicion was observed during the time when the police were on the operations. In this particular way, many people have developed a sense of thinking that police intend to kill people whenever they get the chance to apply their force. Police are seen as the killers, which has brought the gap between them and the citizens whom they are supposed to be serving, and this has brought disturbance and confusion in the country. The models of the country are the center path for the general population's benefit, and the accompanying rights can be dictated by ensuring that there are the key methods for organization gained in the nation for smooth ground. The principles give the Corner stone for the advancement of the nation, and without them, there will be a ton of trouble in discovering solid information data for the reports of the cases under which the police abuse the power that they are given for the security of the USA native. The 2001 International Association of Chiefs of Police report documented national use-of-force data, but it did not itself create legal restrictions on police powers in the United States. People, for example, Thomas Aveni, have given unmistakable data that the police have demonstrated a great deal of the indictment with regards to the barrier instruments, which has prompted a considerable measure of the savage shootings and the common methods for the trials. It has been realized that the vast

majority of the police get a great deal of the murdering the names of the blunders in making a judgment on who they are supposed to shoot, and in the process, they wind up shooting blameless residents. This has exasperated the living method for the general population, specifically in the USA.

Conclusion

A considerable measure of dread and suspicion was seen during the time when the police were involved in the activities. In this specific way, numerous individuals have created a feeling of reasoning that police are expecting to murder individuals at whatever point they find the opportunity to apply their power. Police being viewed as the executioners has brought holes in that point and the residents whom they should serve, and this has brought unsettling influence and perplexity in the nation. It has turned into a sort of marathon and look for police amusement in the middle between the police and the natives since the residents are not in a position to meet or have a spare table with the police. It has become a kind of marathon that seeks to be the king of the game between the police and the citizen since the citizen is not in a position to meet or have the same table as the police force.
